

# Educreations

## Share What You Know

Educreations is a way for students to share ideas and knowledge with classmates, and for teachers to share information with students. Educreations turns the iPad into a recordable whiteboard.

## It's Easy!

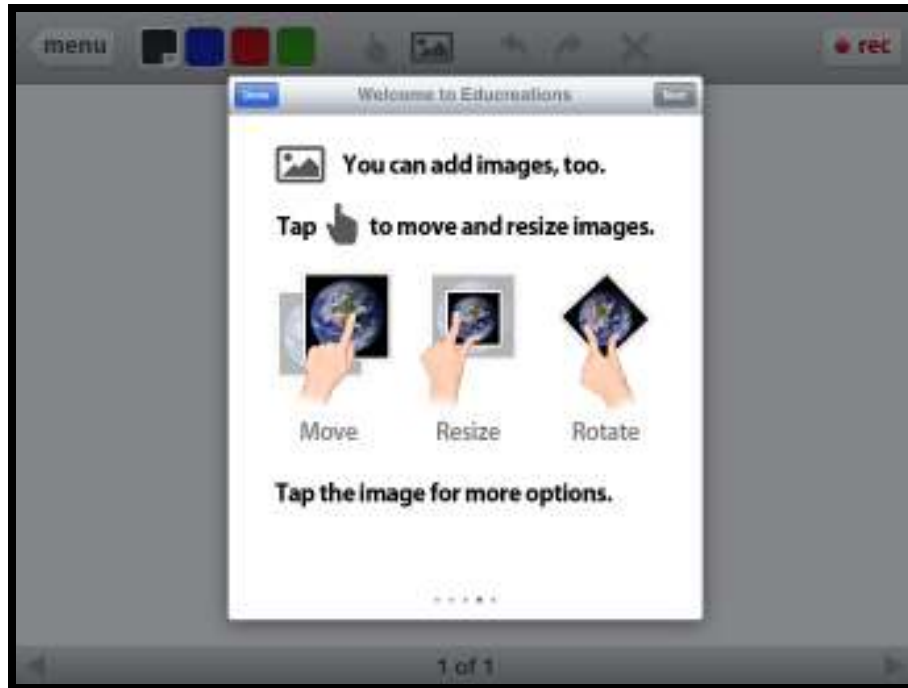

Just tap record and show what you know while explaining your work. Add as many pages as you need while you talk through your lesson.

# Educreations

## Add Images

Snap a photo with the iPad camera or choose one from the library or dropbox. Resize images and annotate on top.

## Share your Knowledge with Others

Share your video lesson with a peer, entire class, or post on [educreations.com](http://educreations.com) for everyone to see. Don't want to share? Keep it private to review later what you learned in class.

## Student Integration Ideas

- Create a video for homework
- Demonstrate understanding of a new concept
- Present information to the class or teacher
- Create a video in a small group to share with another group

## Teacher Integration

- Create a class on [educreations.com](http://educreations.com)
- Have students watch lessons and post questions
- Post the link on iLearn
- Have lessons ready for absent students
